

REVERSAL
Classic

The series is made from 100 % reveral with aluminum profiles. The particularity of these windows is the double thermal bridge that allows to have a high insulation compared to other frames in aluminum. Reveral fixtures are ideal far all structures, as the villas on the sea, particularly exposed to wear of the weather, but also far windows facing the shower, saunas pools etc. Far structures where high security is a prerequisite, the line reveral allows to obtain frames armored, with bulletproof glass and steel profiles that make it unassailable.

Classic Line

The new window aluminium doble thermal break REVER-AL design creates light- footed rooms and enlarges your home beyond.

The window REVER-AL design offers classic design and excellent comfort combined with high-quality technology:

- More light through large-scale glazings
- Narrow frame
- Easy operation of sash up to 120 kg sash weight
- Energy efficient and heating cost saving
- No tripping hazard due to low threshold height
- Attractive colours for individual design requests
- Better stability due to glass fibre low threshold
- Toughened panes protect from injuries when glass breakages
- Can be perfectly combined with all other REVER-AL and REVER-ONE window and sliding systems by G&G
